

ROBOTICS LAW AND ETHICS

Stemming from research done by the RoboLaw project (with European Union support), this workshop introduces a social-science perspective to the technological discussion of robotics. Are existing legal frameworks adequate and workable in light of the rapid proliferation of new technologies? Do developments in this field affect legal and social norms, values, and processes?

Welcome

Barbara Faedda [Italian Academy](#)

Erica Palmerini [Scuola Superiore Sant'Anna, Pisa](#)

Speakers

Sunil K. Agrawal [Columbia University](#)

John Basl [Northeastern University](#)
